

Model Laravel — Template

Documentação técnica do model conforme padrão definido no MVP.

Implementação

```
class Template extends Model
{
    use SoftDeletes;

    protected $fillable = ['name', 'slug', 'description', 'status'];

    public function versions(){ return $this->hasMany(TemplateVersion::class); }
    public function clients(){
        return $this->belongsToMany(Client::class, 'client_templates')
            ->wherePivotNull('deleted_at');
    }
}
```
