

Model Laravel — Client

Documentação técnica do model conforme padrão definido no MVP.

Implementação

```
class Client extends Model
{
    use SoftDeletes;

    protected $fillable = ['name', 'document', 'status'];

    public function users(){ return $this->hasMany(User::class); }
    public function sites(){ return $this->hasMany(Site::class); }
    public function subscriptions(){ return $this->hasMany(Subscription::class); }
    public function templates(){
        return $this->belongsToMany(Template::class, 'client_templates')
            ->wherePivotNull('deleted_at');
    }
}
```
